Welcome to our world!

Hereby we proudly present the new product catalogue from MXR Podoblock. We are pleased to offer you a look into our complete product line. All our products have been invented in order for you to make quick and safe, high-quality X-rays. Every piece of equipment has been innovated, designed, built and tested by ourselves. They are purely based on experience, earned during 15 years of working daily with equine X-rays.

As of now most of our products will be fitted with a NFC-tag. This 'Near Field Communication'-tag will give you and your mobile phone the opportunity to receive additional practical information on that specific product, like instructional videos or safety tips and tricks for optimal working situations. NFC works similarly to the old QR-codes, just simply hold your mobile phone close to the tag and all the information needed will appear on your screen.

Of course we remain active on [f], [t], [in] and [MXRTube], so follow us or link up and you will be the first in line to get the latest news and product updates. We work with a worldwide and direct network to stay in contact with veterinarians and distributors. They are our source for the best ideas and new problems to solve. This way we can always offer you the latest information and come in first with new products. Please challenge us with your ideas or problems and we may very well come up with a solution.

All products you find inside are made from the highest quality materials and are manufactured in Holland. This is of course for daily use and to last for years. MXR Podoblock supplies products for every X-ray system, both for standard and, if desired, special tailor-made products. It doesn't matter if you use a conventional, analogue, digital CR or the latest digital DR flat-panel system, we offer solutions for all of them.

We supply our products worldwide through a network of distributors or, if needed, directly to you.
Feel free to roam around at our website for a total list of distributors. They supply all of our products.
As you can see in this catalogue, we have standard solutions for almost everything in our product line.
Our latest catalogue will always contain novelties and innovations we are working on.
If you are not sure about something or you can't find the product you are looking for in the catalogue, please contact us directly and we will surely offer you the solution you need!

We hope to welcome you into our world,

Nico & Alex

Pictures	Product Description	Specifications	Article number
	Podoblock. Aluminium. Incl. 1 Topblock. 4 Rubber Feet. LM / AP / 45º Hands-free system.	In combination with our Podoholder, Podo-Prot.box or Cowboybox this unique system guarantees maximum radiation distance and no fingers on the X-rays. Hands free system with Podoholder: LM or LM & AP 18 x 24 LM 18 x 24 LM / AP 18 x 24 LM / AP & Dummy 24 x 30 LM 24 x 30 LM / AP 24 x 30 LM / AP & Dummy 8″ x 10″ LM 8″ x 10″ LM / AP 8″ x 10″ LM / AP & Dummy 10″ x 12″ LM 10″ x 12″ LM / AP 10″ x 12″ LM / AP & Dummy 10″ x 14″ LM 10″ x 14″ LM / AP 10″ x 14″ LM / AP & Dummy Dummy LM	 CO 061824081 CO 061824082 CO 061824083 CO 062430081 CO 062430082 CO 062430083 CO 062328081 CO 062328082 CO 062328083 CO 062833081 CO 062833082 CO 062833083 CO 061014081 CO 061014082 CO 061014083 CO 06DUM081

Note: These items above are only suitable for use with Analog and CR cassettes.

	Knee Holder. This new product is a simple to use distance holder that create a maximum distance and safety. Is standard supplied with a 400mm stick that can be adjusted to the left or right in a split second. The material for the Knee Holder used is Polycarbonate 3mm.	For all Analogue and CR cassettes. 18 x 24 24 x 30 8″ x 10″ 10″ x 12″ 10" x 14"	KH 04182418 KH 04243018 KH 04232818 KH 04283318 KH 04101418
	Dental Protection box. Protects your cassette to safely take intraoral X-rays of the incisors and canines and LM and AP of the head. The material for the Protectionbox used is Polycarbonate 6mm. The mountable 400mm long stick, can be turned 360 º. This feature guarantees a minimum of radiation for the person holding the cassette. Easy to use with horses because you can fully concentrate on the position of the cassette. The Dental protection box can also be used together with our Denfinity.	For all Analogue and CR cassettes. 18 x 24 24 x 30 8″ x 10″ 10″ x 12″ 10" x 14"	MB 04182416 MB 04243016 MB 04232816 MB 04283316 MB 04101416

Note: These items above are only suitable for use with Analog and CR cassettes.

	Denfinity. This new light weight portable and collapsible stainless steel stand offers you the freedom to make high quality Skull X-rays. As a start you use the Denfinity stand. This fully stainless steel base plate and vertical telescopic pole guarantees always a secure positioning and right height adjustment. The Denfinity stand allows you to place and replace your required option in a split seconds. You can choose between the Aluminium 3D swivel-tilt joint in combination with our Dentalbox or Protectionbox. The LM-Head support and the fully radiolucent Headrest can be placed directly on the Denfinity. The Denfinity allows you to make all Skull and Jaw X-rays hands free. There are no extra persons needed to take high quality images and create a save working environment. In progress to order the optional Protectionbox, Podoholder or Dentalbox place with your order the required cassette measurements you use. If you have any question about this, contact your local supplier or MXR.	**Denfinity.** Base plate: 350x405x90 mm Vertical pole: 960 mm Vertical travel: 600 mm Material: Stainless steel	DSJ 1050401
		3D-Joint. Aluminium 3D swivel-tilt joint Used in combination with Dentalbox or Protectionbox.	DSJ 10DNL3D
		LM-Head support. Material: Polycarbonate 10mm Swivel range: 180° Universal adapter for fixation Podoholder or Protectionbox	DSJ 10LMHEAD
		Headrest. Material: Polycarbonate 10mm Full radiolucent, no metal parts in detection area at all.	DSJ 10HREST

		Protectionbox. Material: Polycarbonate 3mm Fully closed cassette or DR-panel Protectionbox.	DSJ 10PROT

	The "Juliuster" This new product is designed, tested and approved in collaboration with European Equine Dental Consultancy EEDC by Dr. Julius W.E. Peters. Easy to use device to offset the lower jaw to the left or right for open mouth views with offset technique. Great to investigate the roots and the occlusion surface of the cheek teeth. The Dorso-Ventral views can be made with 5 cm offset to the left and right. Delivered with full Biothane strap and metal buckle that goes from Shet to Shire.	Material: HMPE Offset: 5 cm left / right Adjusted in 12mm steps Strap: 148cm Biothane	DRS 1011560
	Dental X-Block. Can be used directly between the incisors to create quickly 60, 80 or 100 mm space.	Material: Rubber 95°Shore Size: 60 x 80 x 100 mm.	DXB 106810
	Sørender. Be used directly between the scissor teeth in combination with full anaesthetic with spare Ø30 or Ø50 mm hole for tube transit. Standard available in Medium and Large.	Material: Polypropylene Strap from Biothane Medium:100x100x50 / Ø30 Large: 120x115x55 / Ø50	AB 1010030 AB 1012050

DR Flat panel solutions.

MXR Podoblock has a standard solution for every DR flat panel. It doesn't matter if you use the 'newest' or the 'oldest' model on the market. Because the DR flat panels are expensive and more delicate than a CR cassette, you definitely need an good protection for the panel itself.
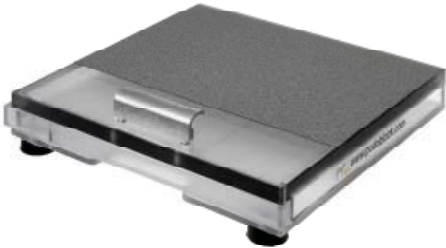

We provide a complete and professional range of products to accomplish this. The basic thing you need is a Protectionbox or Sleeve, our Cowboy box "all in one" is the optimal solution.
Of course we provide DR Skyline tunnels to make navicular Skyline exams of the hoof. You can also upgrade from Skylinebox to the optimal solution: our DR-Combibox.
Please ask your local supplier of the DR flat panel about our products.
For a complete list of all DR flat panel manufacturers and suppliers please see the next pages.
According to this list you can decide what MXR Podoblock article number needs to be ordered.

	DR-Protectionbox. Light-weight protection box. Handheld. Optional: - Grid Compartment (tailor-made) - Greppstr 2.1
	DR-Podo-Protectionbox. Protectionbox with 5mm adaptors to place in our Podoblock and Combibox. Guarantees the same direction and angle with hoof examinations at all times. Optional: - Grid Compartment (tailor-made) - Greppstr 2.1
	DR-Cowboybox. Protectionbox, Podo-Protectionbox and Remote cassette holder all in one. Standard with a mountable telescopic grip which can be turned in 3D positions to get extra distance. Mountable and height adjustable support foot 300mm Optional: - Grid Compartment (tailor-made) - Greppstr 2.1
	Greppstr 2.1 This new universal grip handle can be placed in 2 seconds on almost every Protectionbox, Podo-Protectionbox and Cowboybox and also on several DR-Sleeve's. This way you can choose to place your Greppstr 2.1 where you want or leave it away if you want to use a plane box. Note: If you already have a product from us and want to add our Greppstr to it, please contact us and we can arrange it.
	DR-Skylinebox. Ideal box for standard Skyline exams of the foot. Made of 20mm Polycarbonate. Because of the special angle the horse is standing comfortably and there is more space for the X-ray generator. The top side is supplied with a radiolucent anti-slip surface and the door is secured by a lock.

DR-Combibox LM with optional Podo-Protectionbox	**DR-Combibox LM.** The Skyline side of the Combibox has the same features as the original DR-Skylinebox. Because of the special angle the horse is standing comfortably and there is more space for the X-ray generator. If the DR-Skyline box is turned over it has the extra features to make easy LM and AP flat views of the foot. The special adapters on the DR-Combibox allows you to take "hands-free" X-rays in combination with our Podo-Prot.box or DR-Cowboybox. This way the DR flat panel is protected and always in the right position.
DR-Combibox LM / AP with optional Podo-Protectionbox	**DR-Combibox LM / AP.** There is the possibility to choose between only the LM adapter or, your best option of course, LM and AP adapters. This way it is not necessary to replace the foot for both exams. **DR-Combibox SET.** Both standing feet on the same height is advised with LM and AP examinations. That's why our Combibox Dummy can also be supplied with the DR-Combibox. The Combibox Set is included: DR-Combibox LM / AP Combibox Dummy LM
	DR-Cowboy Package. The optimal combined package of DR-Products to make all X-rays needed safely and in a standardized fashion. This is what you need, for mobile or stationary use in the clinic. The package deal includes: Podoblock DR-Cowboybox DR-Combibox LM / AP Combibox Dummy LM
MXR Podoblock	**DR-Sleeve.** Soft cover Sleeve made of PVC with Velcro closing. Front side is full radiolucent with marked detection area. Inside foam at the edges and corners for extra protection. Depending on the DR system you use the Sleeve comes with a mounted grip handle or with our Greppstr 2.1 Note: The soft cover DR-Sleeve is not suitable to protect your panel against impact force !

	Scandroid. Multi-functional scan stool. Ideal for the mobile veterinarian. Transport position. Position 1: 23 cm. Scanning the foot and lower parts of the leg Position 2: 38 cm. Scanning the front knee and middle parts of the leg Position 3: 51 cm. Scanning the stifle and higher parts of the leg	 The ideal height adjustable stool to transport to the job site or for clinic use. Transport measurements: ø40 x 23 cm. Total weight 9.3 Kg / 20.5 Lb The Scandroid has great stability with in total of 5 castor wheels, 2 wheels comes with locking. Under the seat, safely also during transport, you have some storage space for all necessary scanning tools. If you require we can supply the top surface of the seat with black skai leather. If an extra height is required we have an optional Extension with a height adjustment from 63 up to 75cm. The Extension also fits under the seat. 75 cm	SK 1039270 SK 10EXT307
	Scan Wedge. Simple wedge for extra extension to be placed under the hoof.	Material: Rubber 95° Shore Dimensions: 180x150x65-0mm 20° Angle	SW 1050065-0
	Standoff PAD Soft A new soft standoff adaptable for wide range of linear-array transducers.	Standoff 10mm – 100 x 100 mm Standoff 20mm – 100 x 100 mm Standoff 40mm – 100 x 100 mm	LAS 10651010 LAS 10651030 LAS 10651040

		The "SCANster".	MXR Tube	
		Transport position.		
			The optimum ultrasound solution to create the ideal working height at all times.	
			Lightweight durable aluminium stand.	
		Position 1: Height 25 cm. For imaging the foot and pastern.	Can be stored in vertical position to save space. Completely folded ideal for transport.	
			Transport: 58x41x26 cm Total weight: 12.5 Kg Plateau size: 55x37.5 cm Max.load: 15 Kg	
		Position 2: Height 42 cm. For imaging the forelimbs and hind limb.	4 locking Ø80mm castor wheels.	VS 1045321910
			Especially designed for the portable ultrasound.	
			Also works great as a clinic cart to put on small equipment to carry to the job site.	
		Position 3: Height 77 cm. For imaging the stifle, shoulder and elbow.	Optional with professional probe rack to store in total 2 ultrasound probes, gel bottle and Standoff PAD.	CUPH 102P1B1S
		Position 4: Height 112 cm. For imaging the hip, sacrum, back, neck and endo-rectal images.	C E The SCANster is a Class 1 European Medical Devices MD 93/42/EEG NL-CA002-2012-24232	

	The "DRagster".		
	Transport position.	Durable aluminium in height adjustable cart for the more heavy machines and equipment. Standard delivered with 300N gas spring for step less variable height adjustment. Can be stored in vertical position to save space. Easy transport position with the pull out handle.	
	Position 1: Height 25 cm.	Transport: 68x51x27 cm Total weight: 15 Kg Plateau size: 60 x 46 cm Max.load: 30 Kg 2 big Ø200mm wheels 2 locking Ø125mm castors Works great as a mobile cart for small and big equipment. So also for your DR flat panel suitcase.	VS 10322010
	Position 2: Secured height 55 cm		
	Position 3: Height 90 cm.	C E The DRagster is a Class 1 European Medical Devices MD 93/42/EEG NL-CA002-2012-24232 .	

jiXtr.

Specifications.
Transport:
 16 x 13 x 68 cm
Low position:
 27 x 29 x 64 cm
High position:
 27 x 29 x 189 cm
Stroke range:
150 cm
Weight:
 4.5 Kg / 9.9 Lb

The rotation of the X-ray source in combination with the unlimited tilt of the jiXtr secures an accurate position for Skyline views.

The brand new jiXtr is yet another big step in the evolution of our products.

With the jiXtr your X-Ray source becomes an easy-to-handle, versatile and highly portable instrument that will cover every angle, every spot and every height you desire.

This light-weight, aluminium support stand allows you to work quickly and safely, and spares your back in the process.

The jiXtr can be adjusted without pre-defined increments and has a variable height-adjustment. And as for the icing on the cake: The jiXtr is compatible with all X-Ray devices that are on the market!

A "fix & release" system is integrated into the handle for easy height adjustment.

JSM 09JIXTR-14

Stat-X Vaquero.

Foldable Mobile Stand for X-ray machine.

Total weight of the Stat-X only 22 Kg.

3 Swing arm adapter positions with Quick release.

Swing arm available in 580 and 750 mm and are adjustable in height with 1 fingertip

Tailor-made bracket for X-ray unit.

Swivel range arm 5º left, 5º right.

Weight range for portable X-ray units Stat-X: 5 - 25 Kg.

Completely folded / unfolded in only 10 seconds.

External dimensions completely folded 147 x 30 x 35 cm.

Standard colour: PMS260C Satin.

The new, faster Quick-release for positioning the Swingarm in all heights

Swing arm length 750 mm.
Vertical travel arm 700 mm.
Vertical travel stand 700 mm.
Max.height bracket: 207 cm.

Weight portable X-ray source:
  5.0 – 15.0 Kg   RSM 09750 LW
  15.1 – 17.0 Kg   RSM 09750 HW

Swing arm length 580 mm.
Vertical travel arm 500 mm.
Vertical travel stand 700 mm.
Max.height bracket: 198 cm.

Weight portable X-ray source:
17.1 – 25.0 Kg   RSM 09580HW

Available for stationary use with short legs and extra contra weight to create more working space between Horse and Stat-X.   RSM 09SLEW

All Stat-X models are CE marked Class 1 medical product.

MD (89/392/EEG)
MDD (93/42/EEG)

Note: by ordering always provide the exact details (brand, type & weight) from your X-ray source.

Stat-X Pequeño.

Small foldable mobile stand for X-ray machine. The Stat-X Pequeño is the shorter and lighter version of the Vaquero. That way more easily to transport to the job site.

Total weight of the Pequeño only 20 Kg.

3 Swing arm adapter positions with new, faster Quick-release.

The 750mm Swing arm is adjustable in height with 1 fingertip.

Tailor-made bracket for X-ray unit.

Swivel range arm 5º left, 5º right.

Weight range for portable X-ray units. Pequeño: 5 - 17 Kg.

Completely folded / unfolded in less than 10 seconds.

External dimensions completely folded 105 x 30 x 35 cm.

Standard colour: PMS260C Satin.

The new, faster Quick-release for positioning the Swingarm in all heights

Swing arm length 750 mm.
Vertical travel arm 700 mm.
Vertical travel stand 410 mm.
Max.height bracket: 165 cm.

Weight portable X-ray source:
 5.0 – 15.0 Kg
 15.1 – 17.0 Kg

PSM 09750 LW
PSM 09750 HW

All Stat-X models are CE marked Class 1 medical product.

MD (89/392/EEG)
MDD (93/42/EEG)

Note: by ordering always provide the exact details (brand, type & weight) from your X-ray source.

Stat-X Espléndido.

Small foldable mobile stand for X-ray machine. The new 3D adjustable head creates a lot of extra possibilities.
You can secure your generator in fixed 12° positions with a maximum of 35° left and right. When turned totally upside down the maximum height is sufficient for every X-ray exposure in your range.

Total weight of the Espléndido is only 22 Kg.

3 Swing arm adapter positions with new, faster Quick-release.

The 750mm Swing arm is adjustable in height with 1 fingertip.

New universal bracket for every X-ray unit.

Swivel range arm 5º left, 5º right.

Weight range for portable X-ray units. Espléndido: 5 - 17 Kg.

Completely folded / unfolded in less than 10 seconds.

External dimensions completely folded 114x30x35 cm.

Standard colour: PMS260C Satin.

Swing arm length 750 mm.
Vertical travel arm 700 mm.
Vertical travel stand 410 mm.
Max.height bracket: 188 cm.

Weight portable X-ray source:
 5.0 – 15.0 Kg
 15.1 – 17.0 Kg

The 180° rotation with fixed positions of the X-ray source secures an accurate position for Skyline views.

	## Digital Hoof Tester. The Digital Hoof Tester™ measures the sensitivity of a horse's hoof. The main difference is that this is the first digital hoof tester. It is made from lightweight aluminum and has stainless steel side reinforced plates. Mechanical features: * Hoof contact swivel pads * Center axis with return spring * Modular, ergonomic design * Smooth contours * Single-hand grip Digital Features: * Two digit LCD readout * Set point with high/low reply * Automatic shut off * Invertible display * Low power / long battery life	VV 10DIG07
	## Digital Hoof Gauge. The Digital Hoof Gauge™ accurately measures the angle of a horse's hoof up to 0.1th of a degree. Collapsible, Rugged, Time saving, Auto On/Off, Water tight, Accurate, Long lasting battery	DHG 10PEP01
	## 123Shoeing Kit. 1. **Shoe Puller** 2. **Hammer** 3. **Clinch Cutter** The 123Shoeing Kit is an essential tool for de-shoeing a horse. Whether you're an equine Vet or a Farrier. You should take this high quality, professional 3-in-1-tool in your basic kit. Use this quality farrier-hammer with the clinch cutter for removing nails during de-shoeing. You can use this indispensable tool to cut nail clinches when removing shoes and to remove "hidden" nails embedded in hoof wall, which can probably ruin your nipper. The essential tool for practical minded professionals!	PZT 10123SK
