RAYENCE CHIROPRACTIC DIGITAL IMAGING SOLUTIONS

Rayence delivers today's most advanced and complete chiropractic digital imaging viewing solution with its ChiroView software. Designed to provide user-friendly functionality and increase workflow, Xmaru ChiroView allows image viewing to be done in every exam room throughout the office. The software also allows users to import DICOM images from outside facilities, burn images to a CD/DVD or USB memory stick, and print to paper. With our industry leading chiropractic measurement tools and easy to follow tutorials on how to properly apply the measurement overlays, Rayence provides Chiropractors a sensible and economical Digital X-ray solution.

Chiropractic Measurement Tools

Skull Analysis

Vastine-Kinney method of pineal gland localization
Sella turcica size
Basilar angle
McGregor's line
Chamberlain's line
McRae's line
Height index of Klaus-Remove
Boogard's line
Boogard's angle
Anterior atlanto-occipital dislocation measurement

Cervical spine analysis

Atlantodental interspace (ADI)
Method of Bull
George's line
Cervical spinolaminar line (Posterior cervical line)
Sagittal dimension of the cervical spine canal
Cervical gravity line
Cervical lordosis (Angle of curve)
Cervical lordosis (depth measurement)
Cervical lordosis (method of Jochumsen)
Ruth Jackson stress lines of the cervical spine (flexion)
Ruth Jackson stress lines of the cervical spine (extension)
Prevertebral soft tissues

Thoracic spine analysis

Cobb method scoliosis evaluation
Risser-Ferguson method of scoliosis evaluation
Thoracic kyphosis
Thoracic cage dimension

Lumbar spine analysis

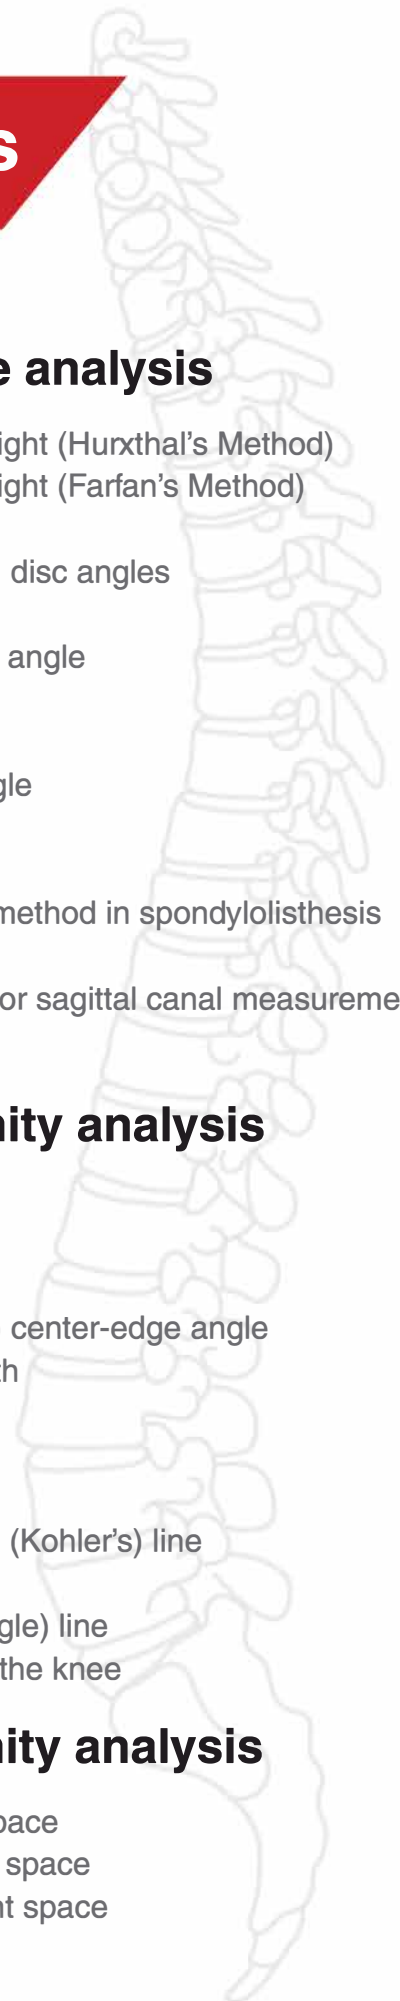

Intervertebral disc height (Hurxthal's Method)
Intervertebral disc height (Farfan's Method)
Lumbar Curve
Lumbar intervertebral disc angles
Lumbar lordosis
Lumbosacral lordosis angle
Sacral inclination
Lumbosacral angle
Lumbosacral disc angle
Lumbar gravity line
Lateral bending sign
Meyerding's grading method in spondylolisthesis
Ullmann's Line
Eisenstein's method for sagittal canal measurement
Intercrestal line

Lower extremity analysis

Teardrop distance
Hip joint space width
Acetabular depth
Acetabular (Wiberg's) center-edge angle
Symphysis pubis width
Presacral space
Acetabular angle
Iliac angle and index
Acetabular protrusion (Kohler's) line
Femoral neck angle
Skinner's (femoral angle) line
Axial relationships of the knee

Upper extremity analysis

Glenohumeral joint space
Acromiohumeral joint space
Acromioclavicular joint space

Cervical Curve

Atlantodental Interspace (ADI)

Cobb's Method of Scoliosis Evaluation

George's Line

Posterior Cervical Line

Sagittal Dimension of the Cervical Spine Canal

Cervical Gravity Line

Gonstead Measurements

Risser-Ferguson Method

Vastine-Kinney Method of Pineal Gland Localization

Sella Turricata Size

Basilar Angle

McGregor's Line

Chamberlain's Line

Lumbar Curve

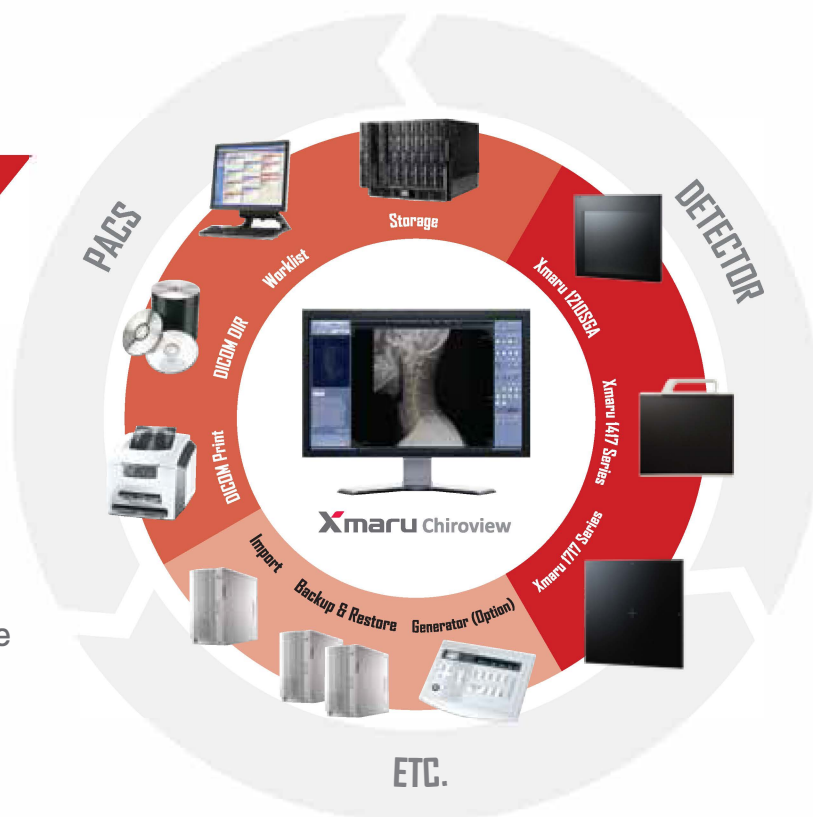

RAYENCE

X - R A Y + S C I E N C E

Main Features

- DICOM File Management
- DICOM Printing
- CD Burning with CD Viewer
- Image Magnification
- Image Sticking - Up to 3 images
- Display Images Side-by-Side
- Measuring the Length and Angles of the Image
- Adding Annotation Text, Graphics and Electronic Markers to an image

Harmonic Stitching (optional)

Image stitching is achieved by selecting one of three methods: Full-Auto, Semi Auto or Manual. To eliminate the exposure borders of each image due to varying densities, Rayence's advanced gradation process is automatically applied.

Together with Rayence's optional automatic stitching software, up to three views can be automatically stitched at a touch of a button, making stitching examinations easier than ever to attain.
